Illustration

Illustrations are not just decoration. As a visual explanation of complex processes or concepts they support and translate ideas in a more fun and engaging way.

Illustrations

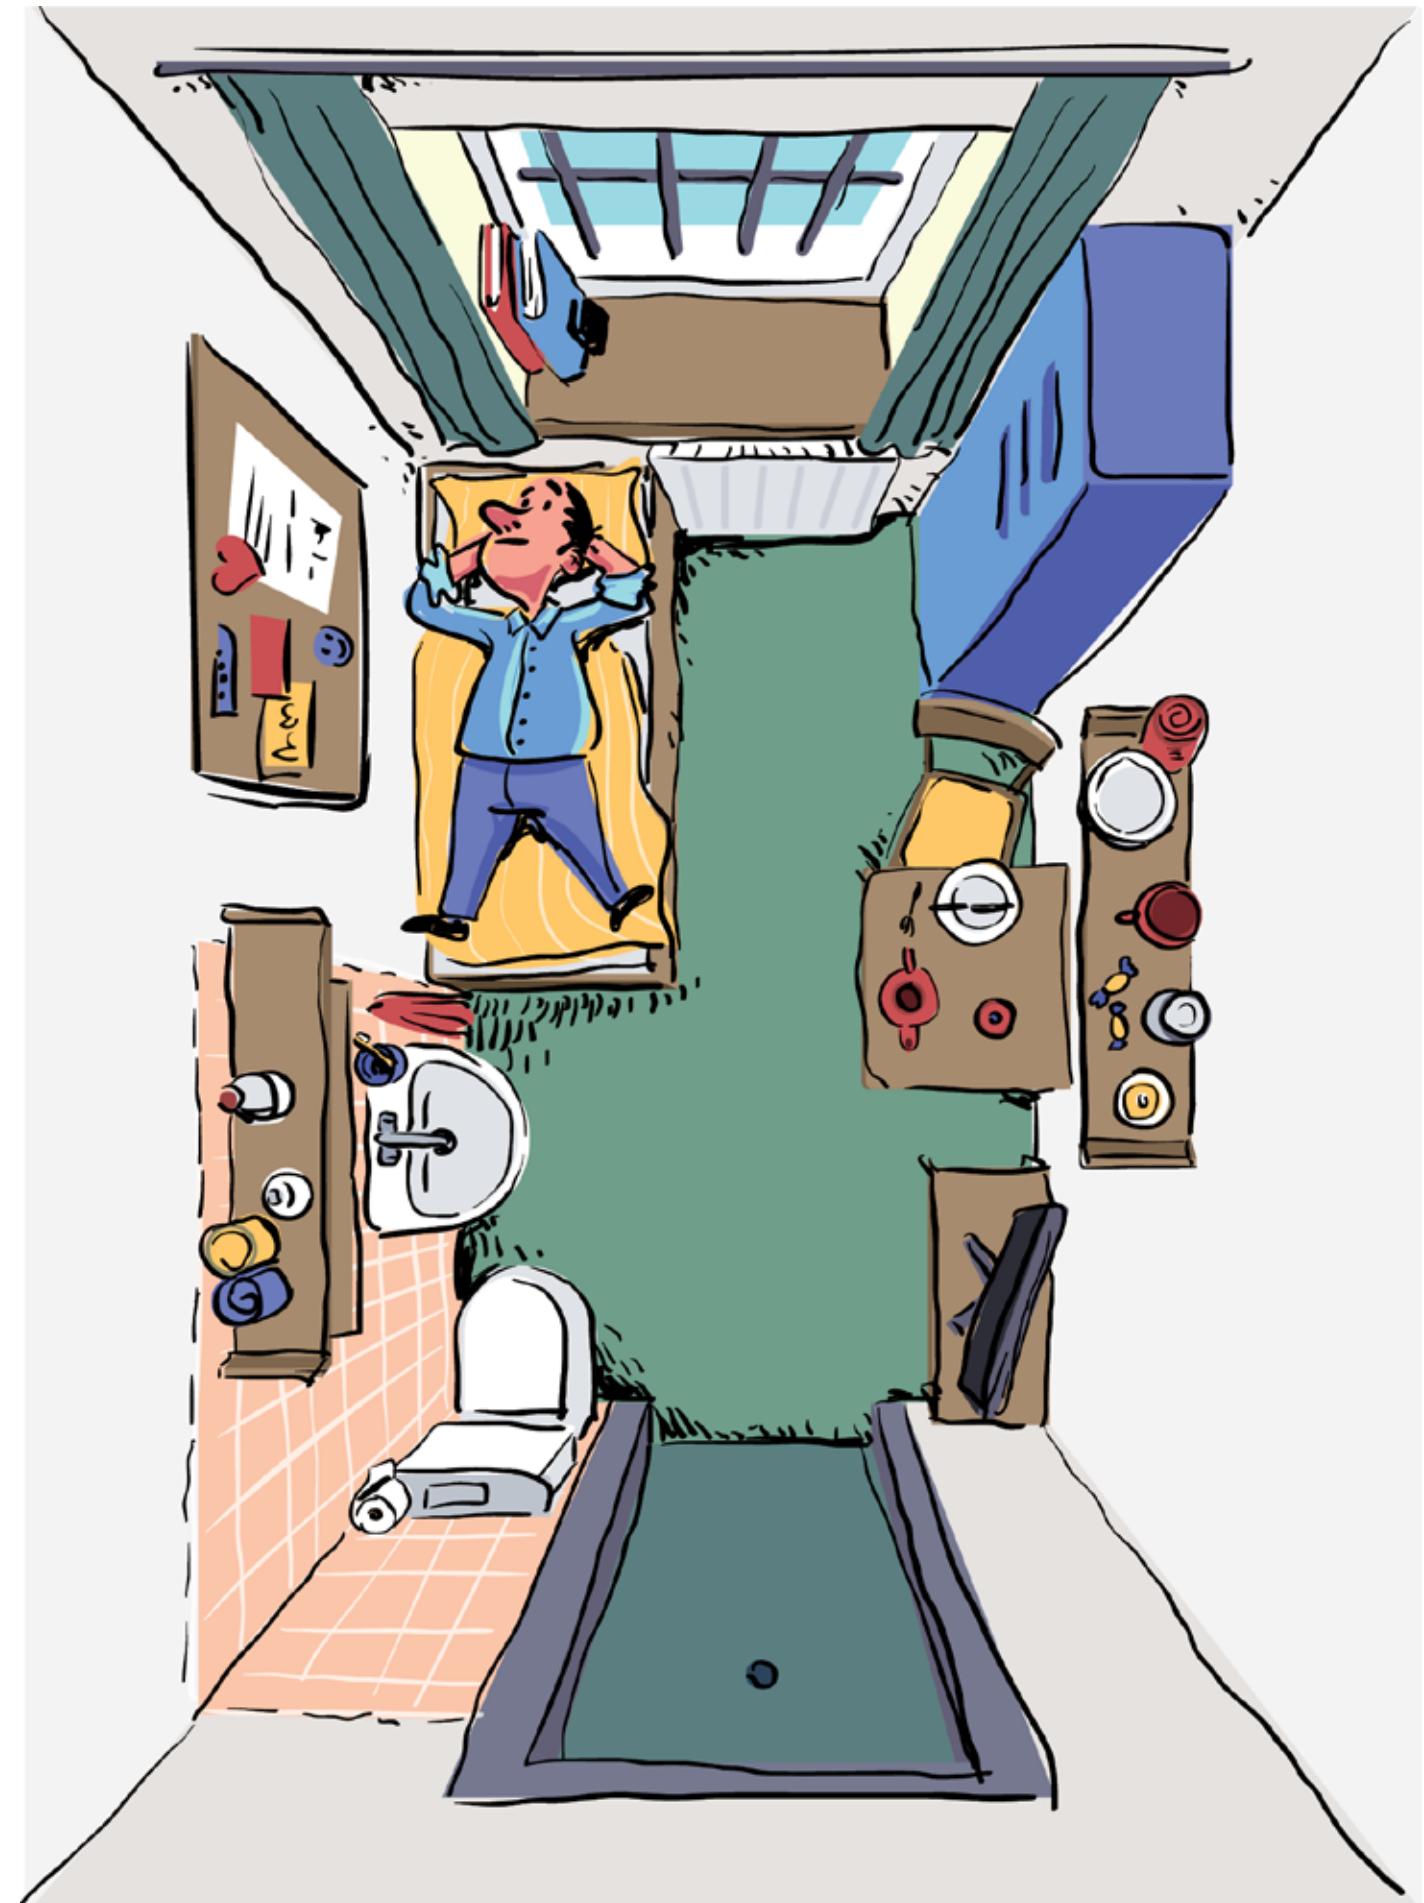

I have a clear preference for vector illustration, and my style tends to be fun, colourful, minimal in shape, and yet full of details. The goal for every image is to add personality and joy to their respective projects.

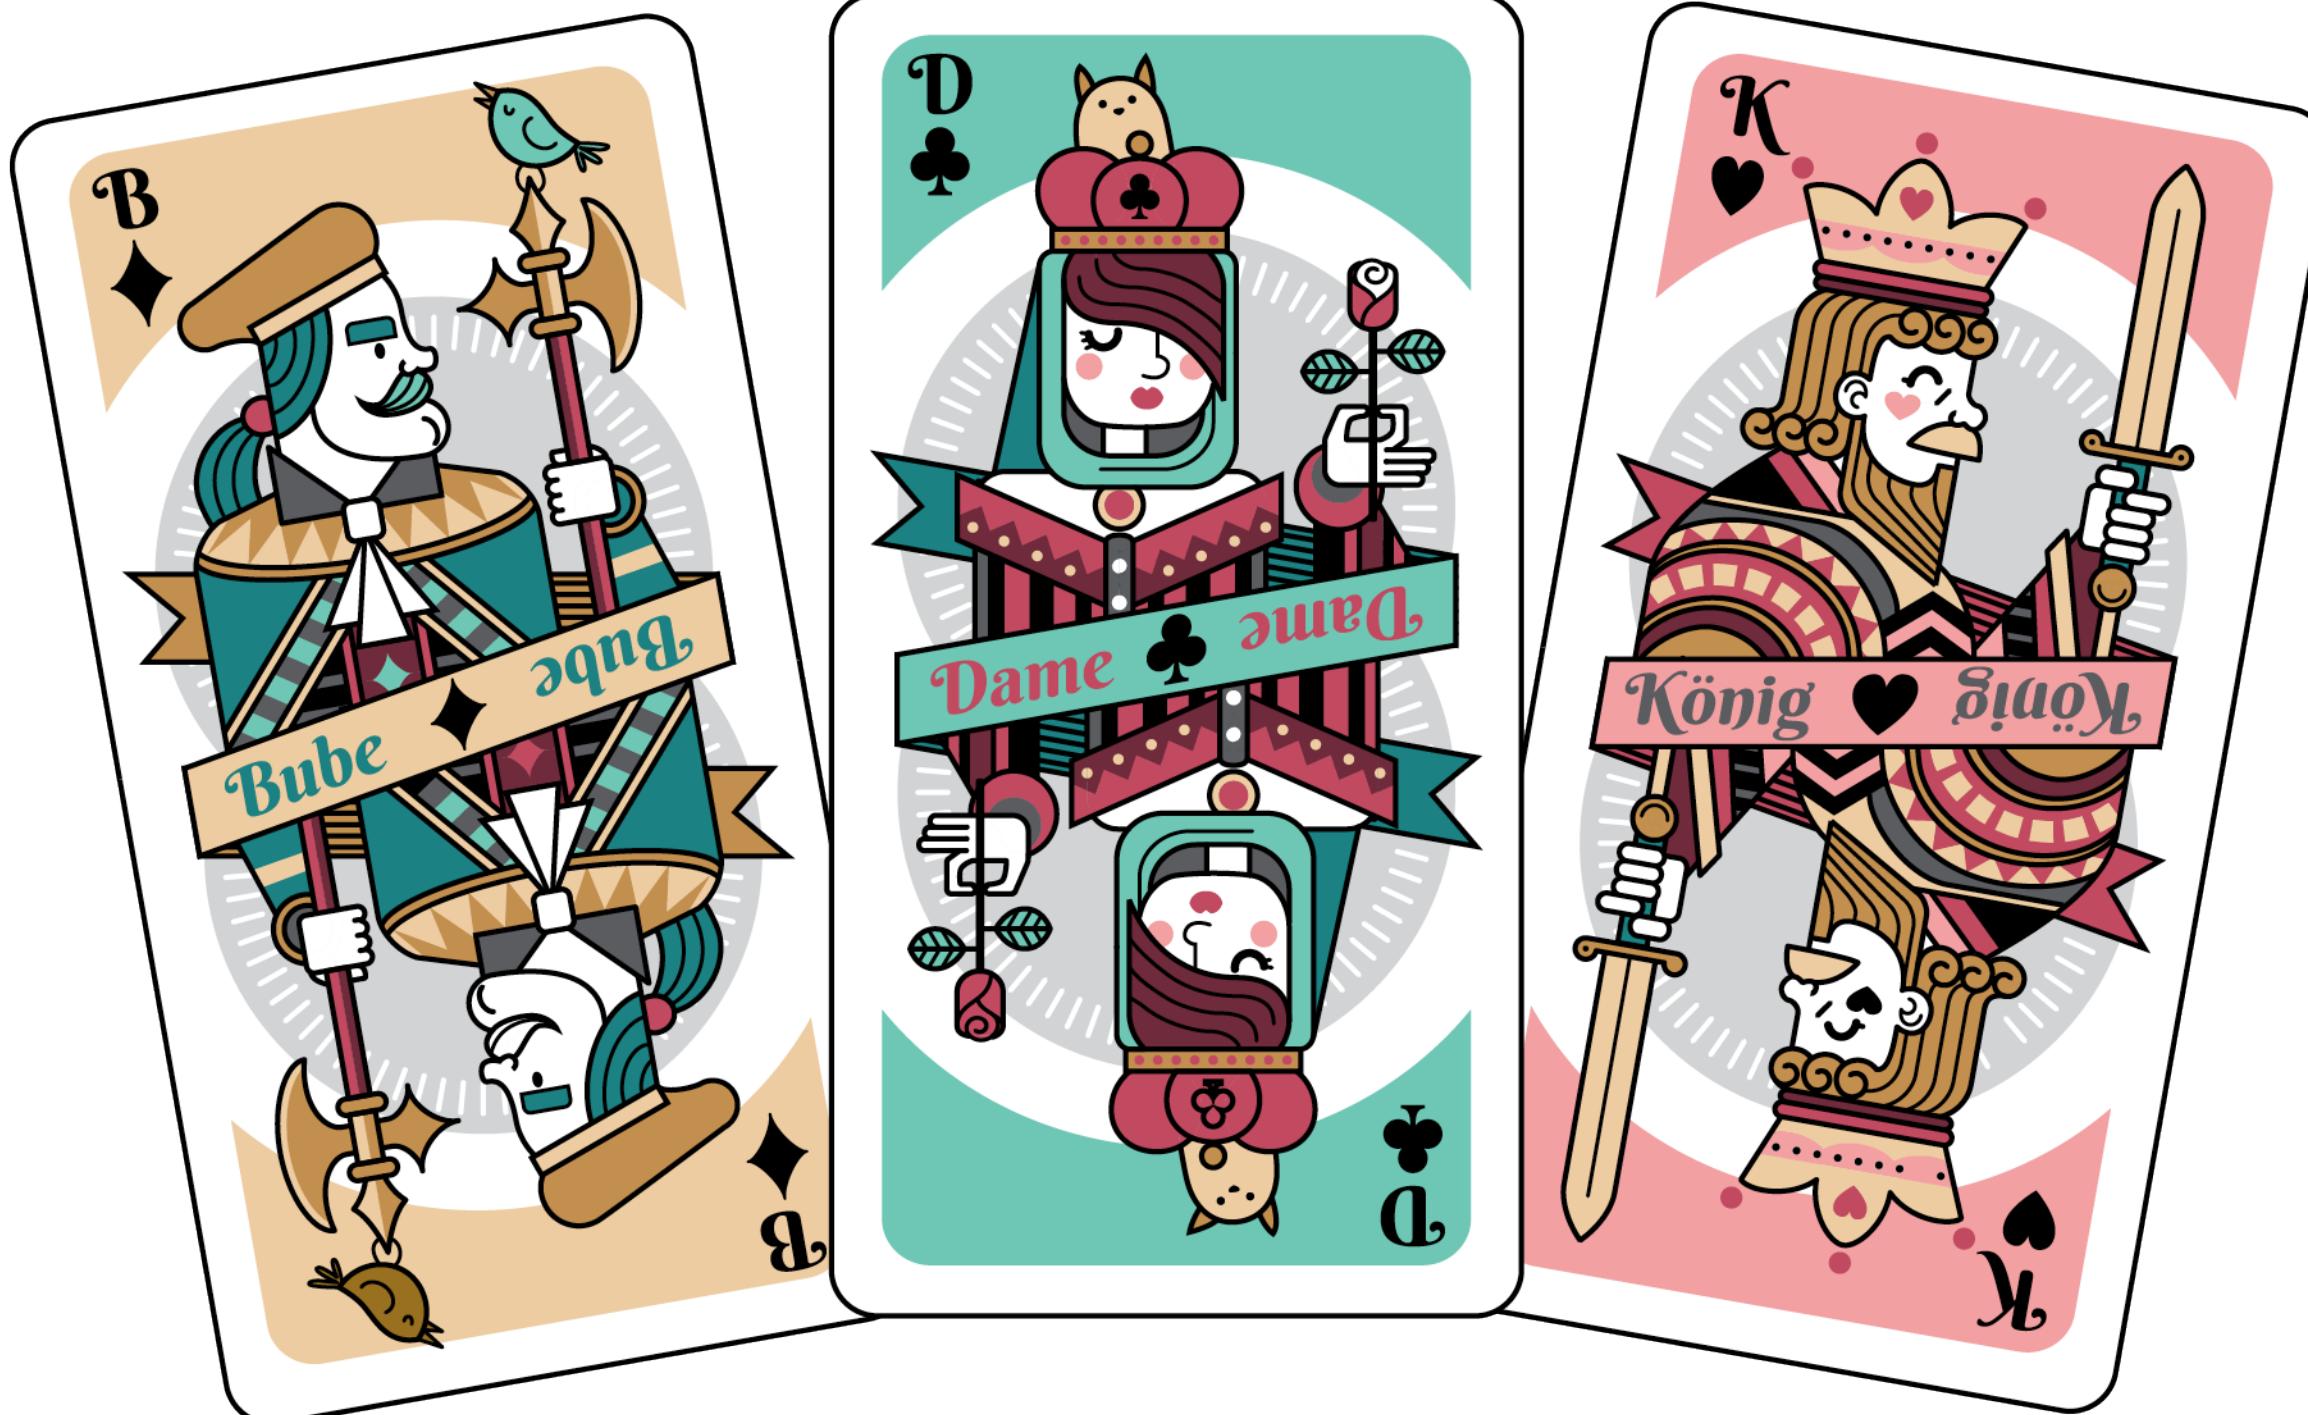

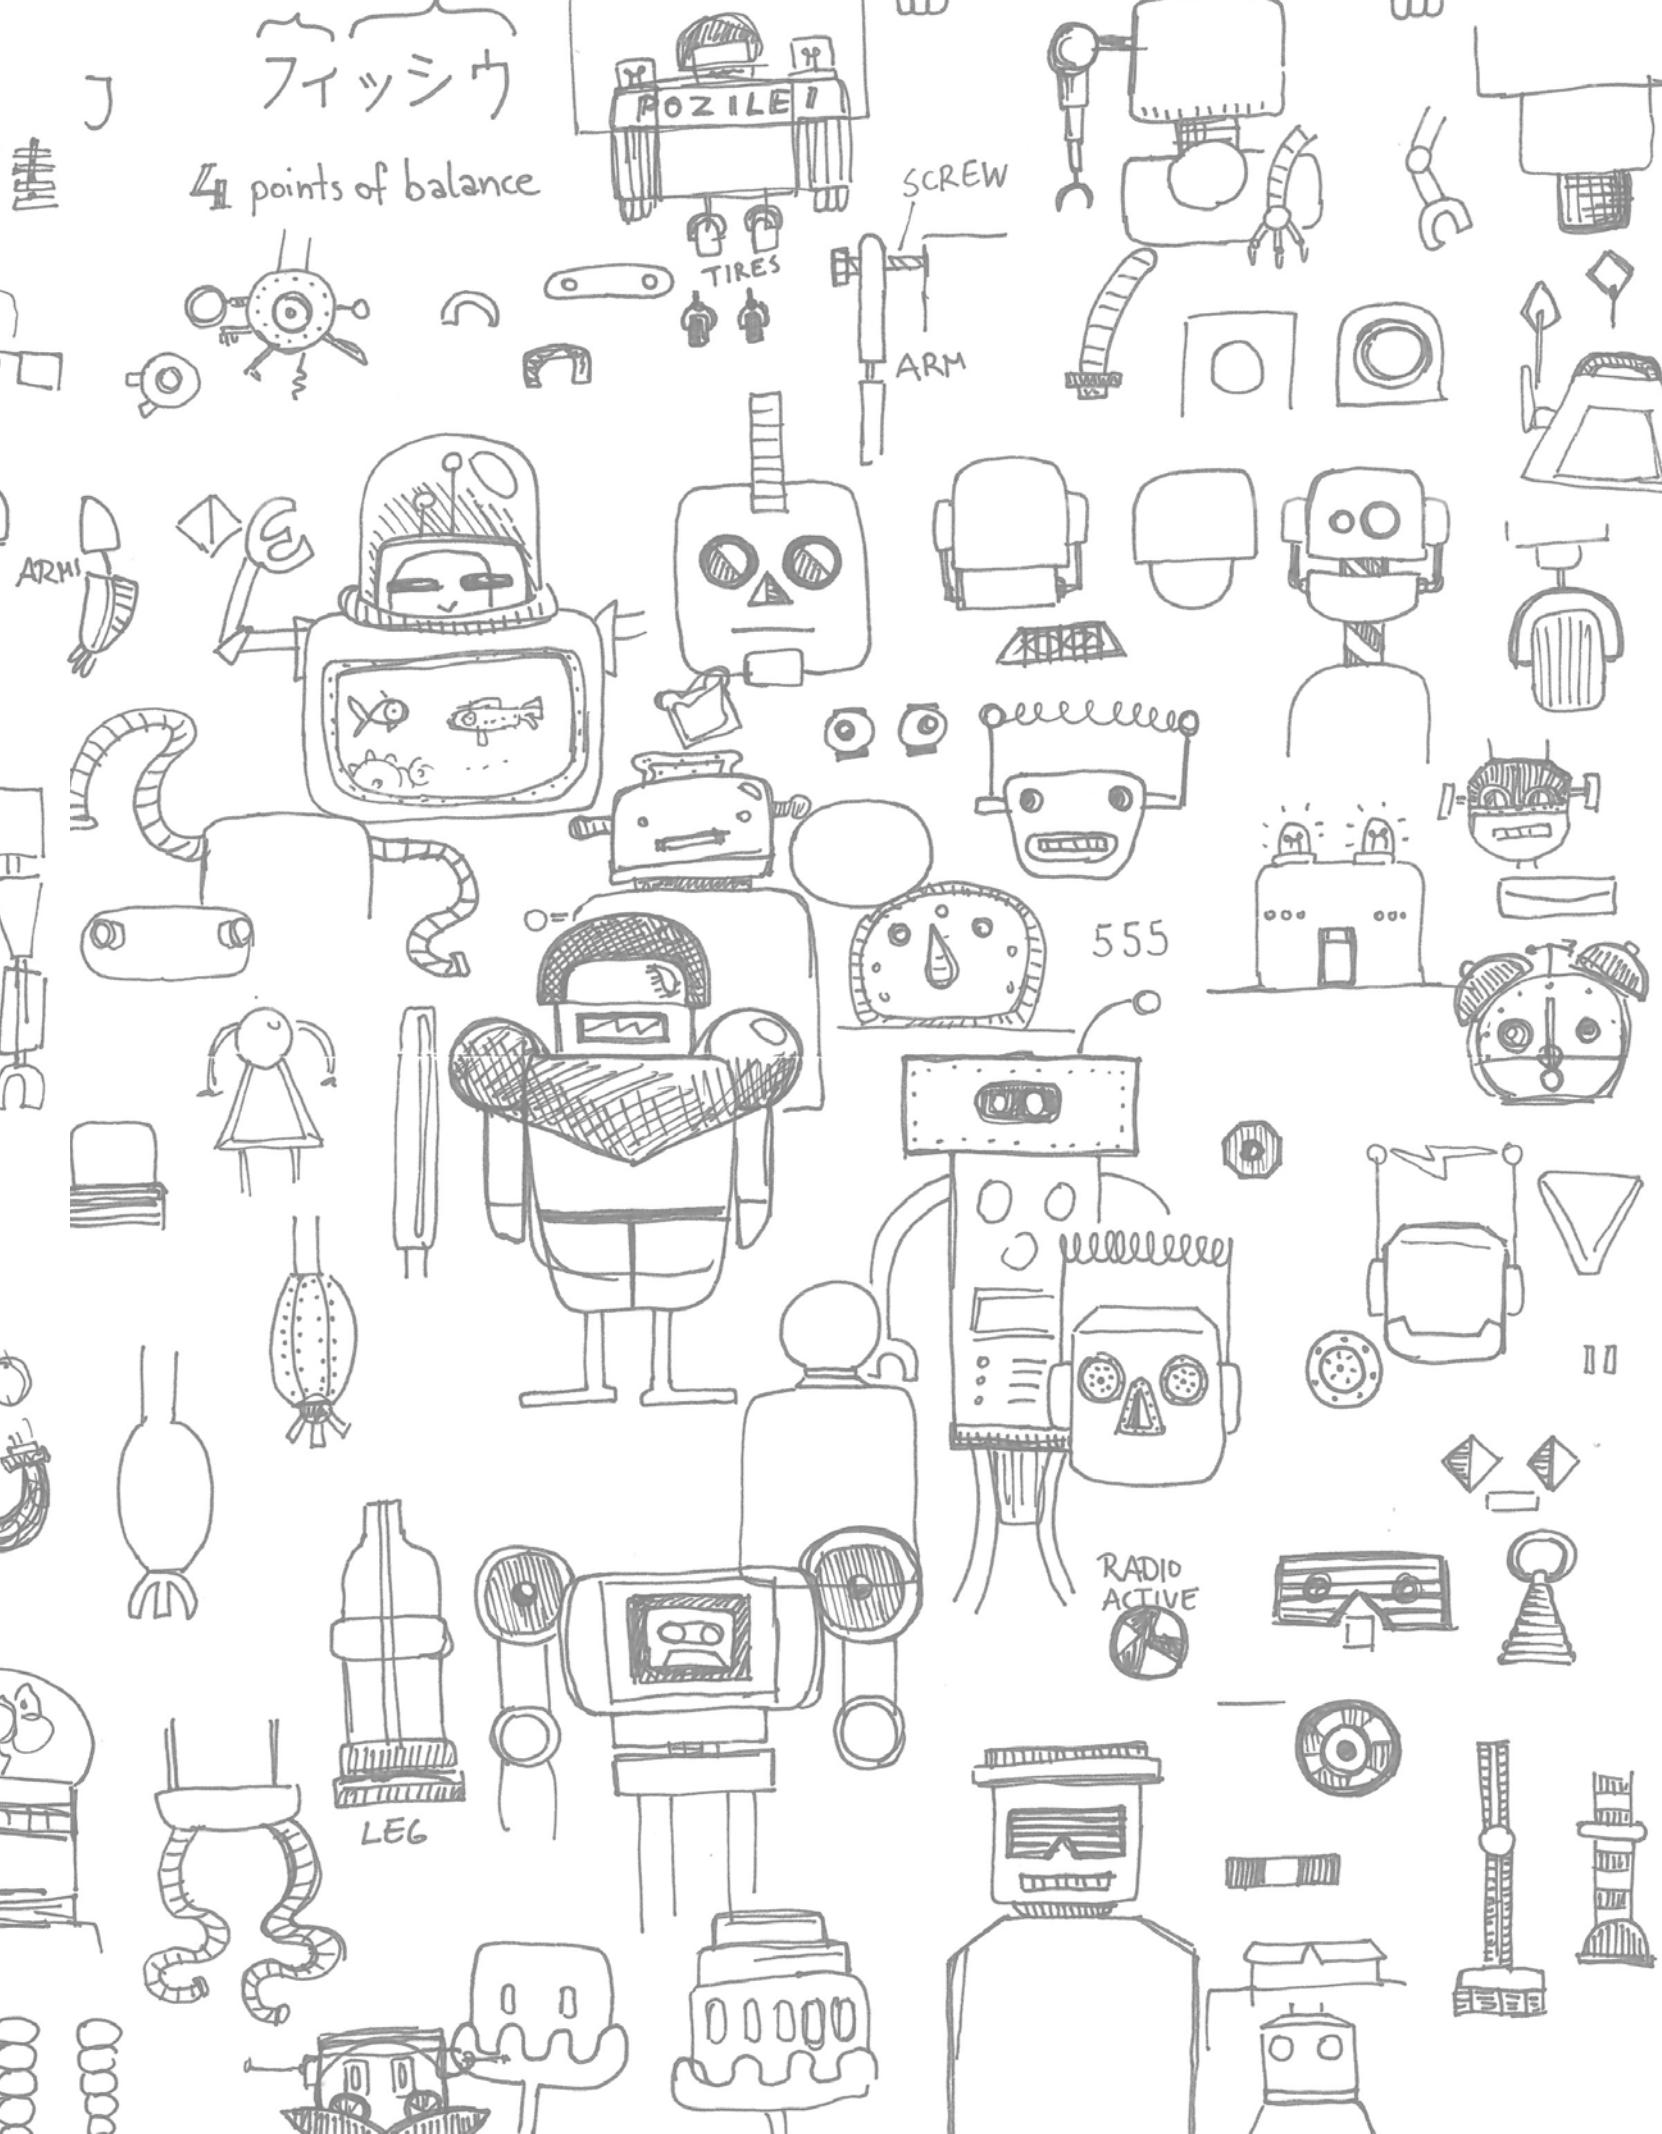

Interactive Games

for children

The Interactive games were created for the dpa children's news team using a customized CMS (content management system). The time spent per project was between 2,5 to 3 days.

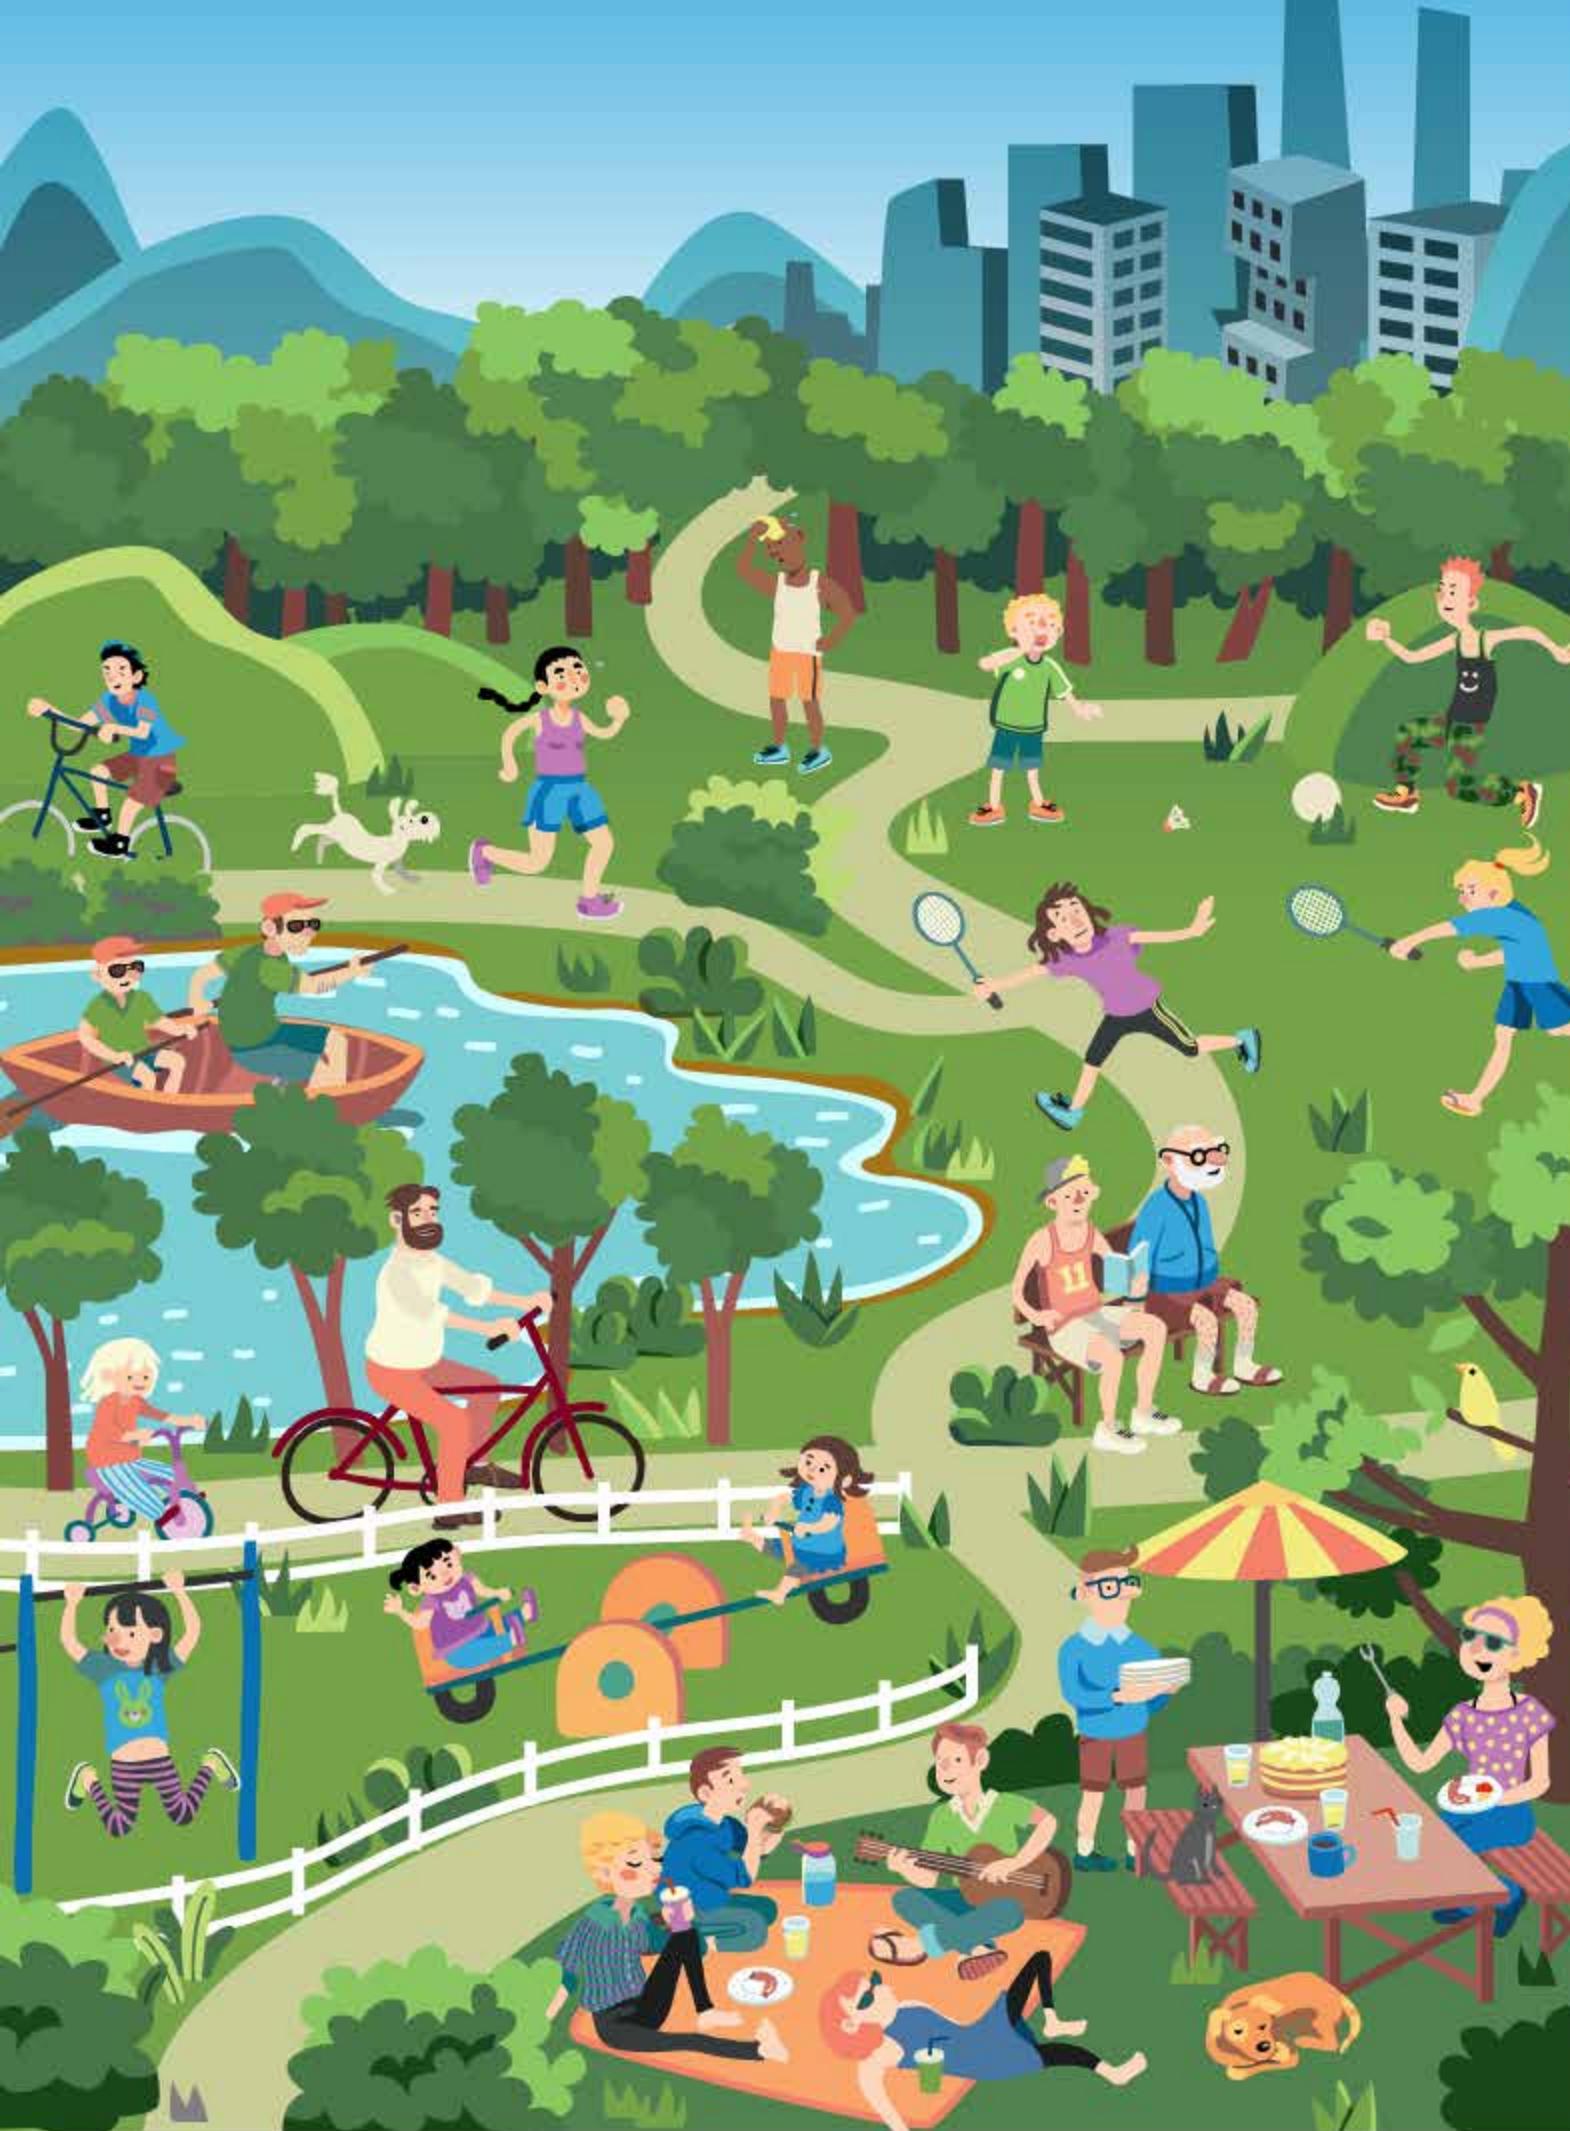

Please try them out yourself, clicking on the titles will take you to an online version.

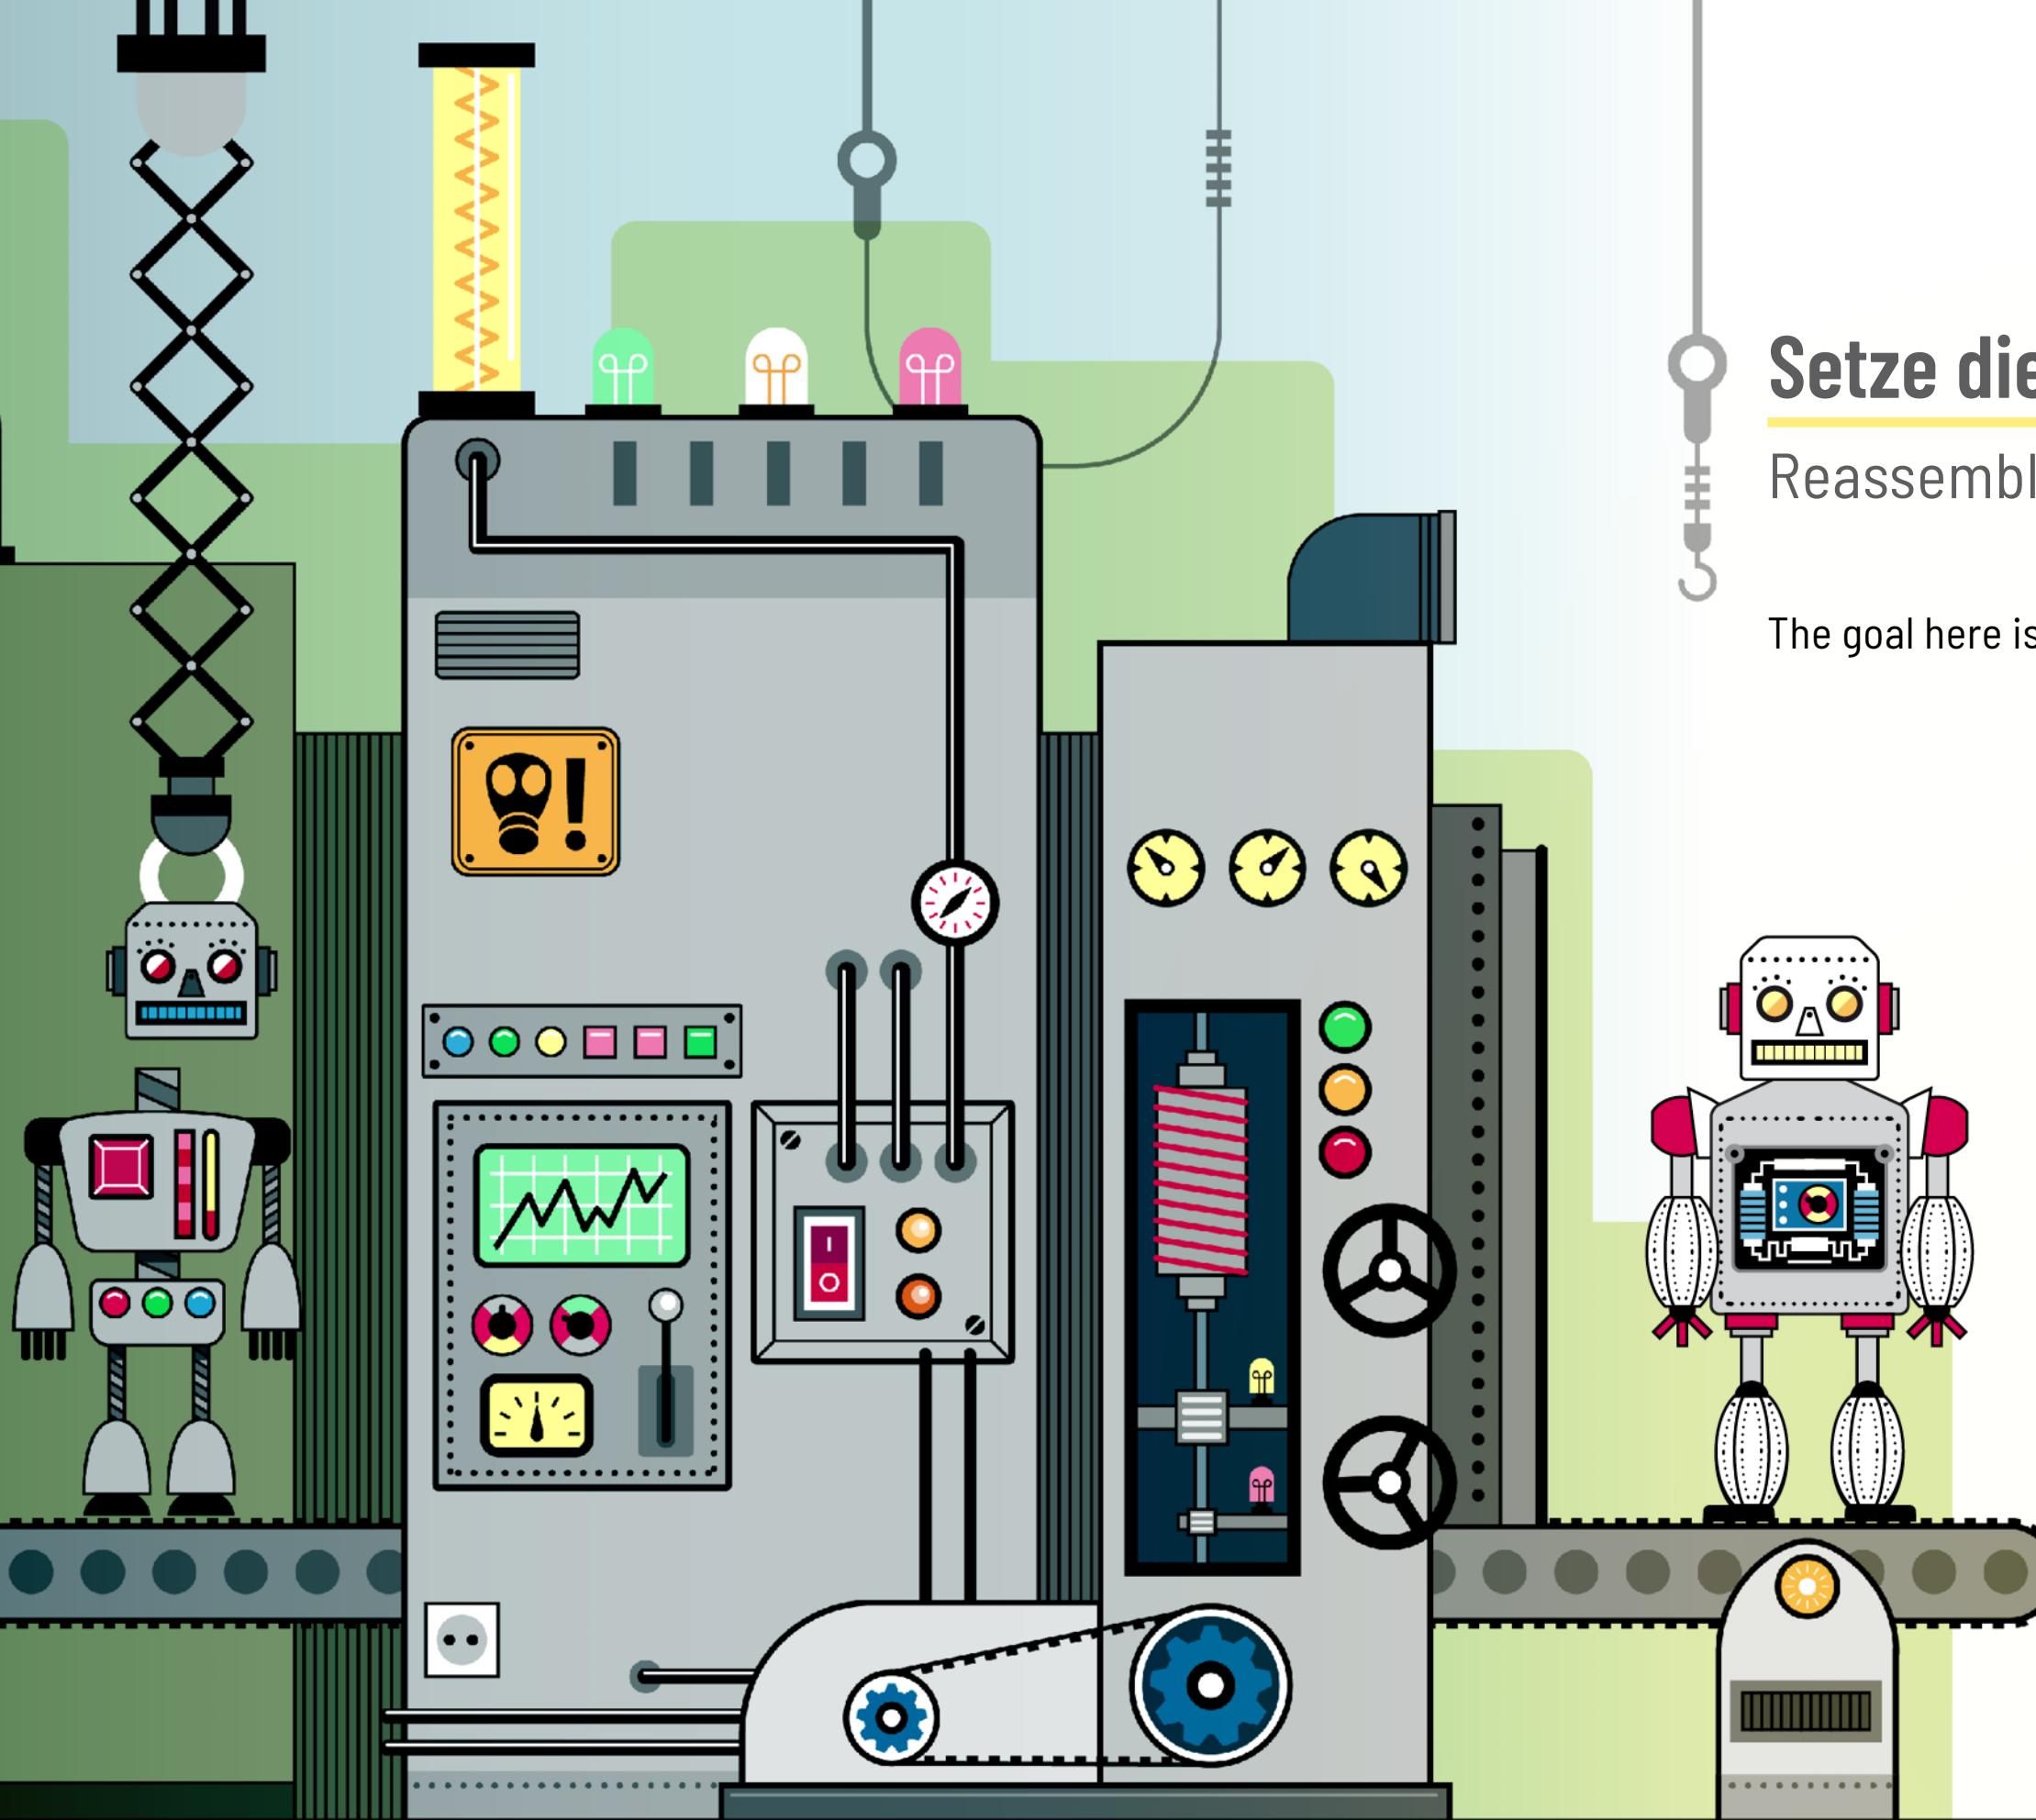

Finde die Unterschiede!

Find the differences!

A game where you need to find the 10 differences between one painting and another.

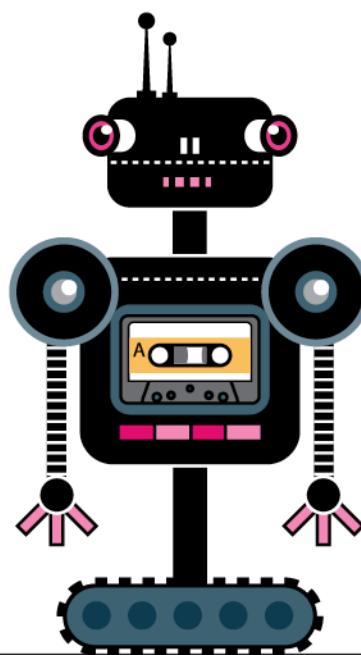

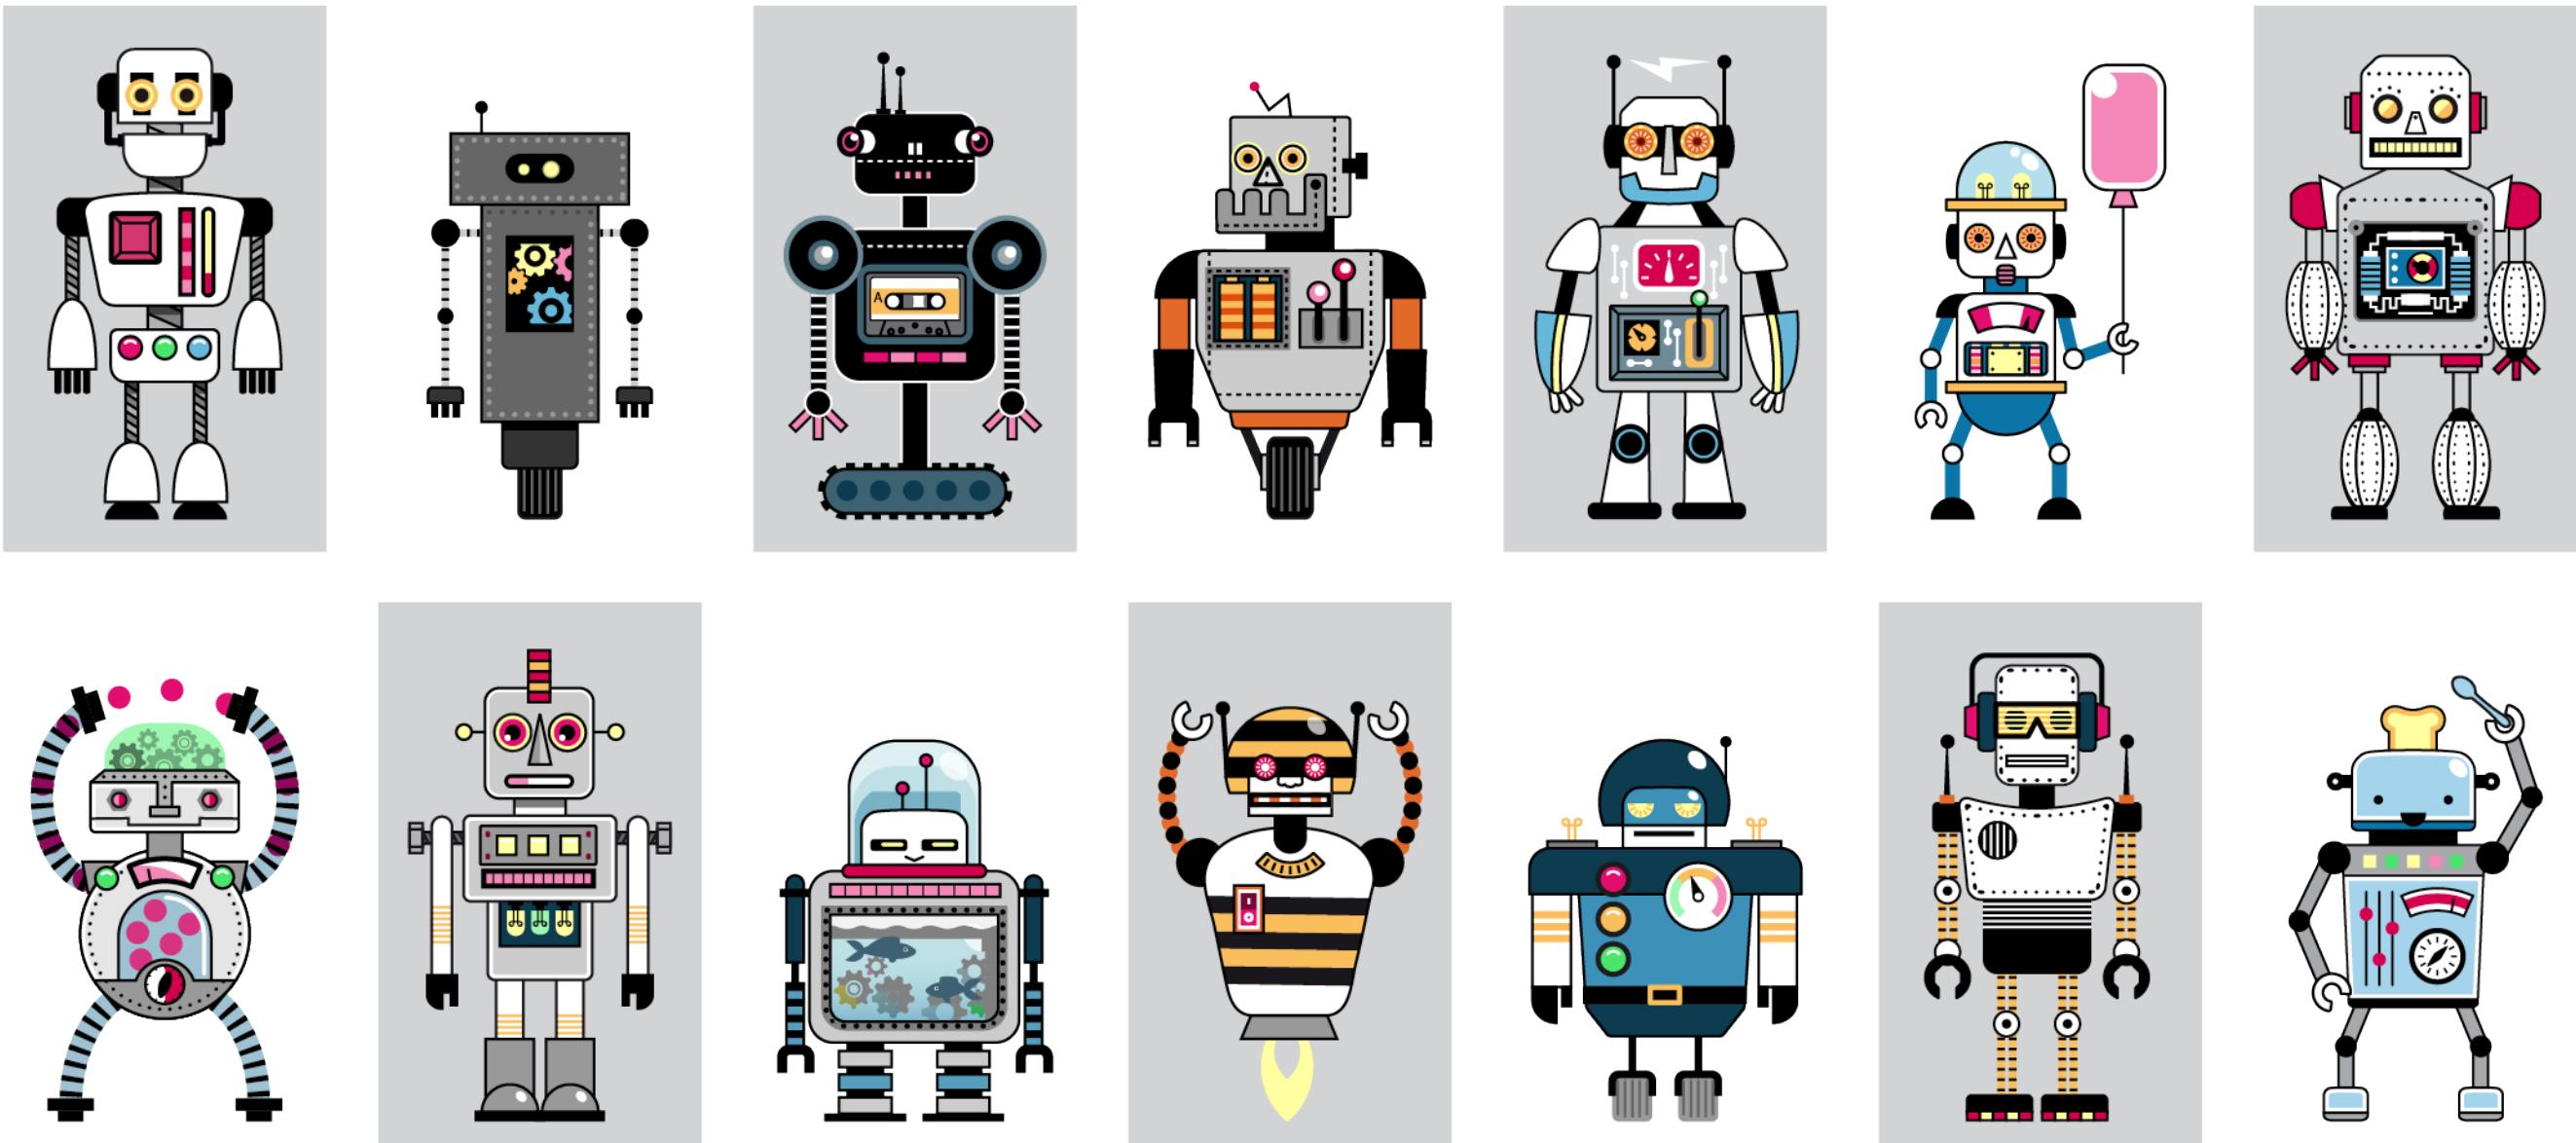

Setze die Roboter zusammen!

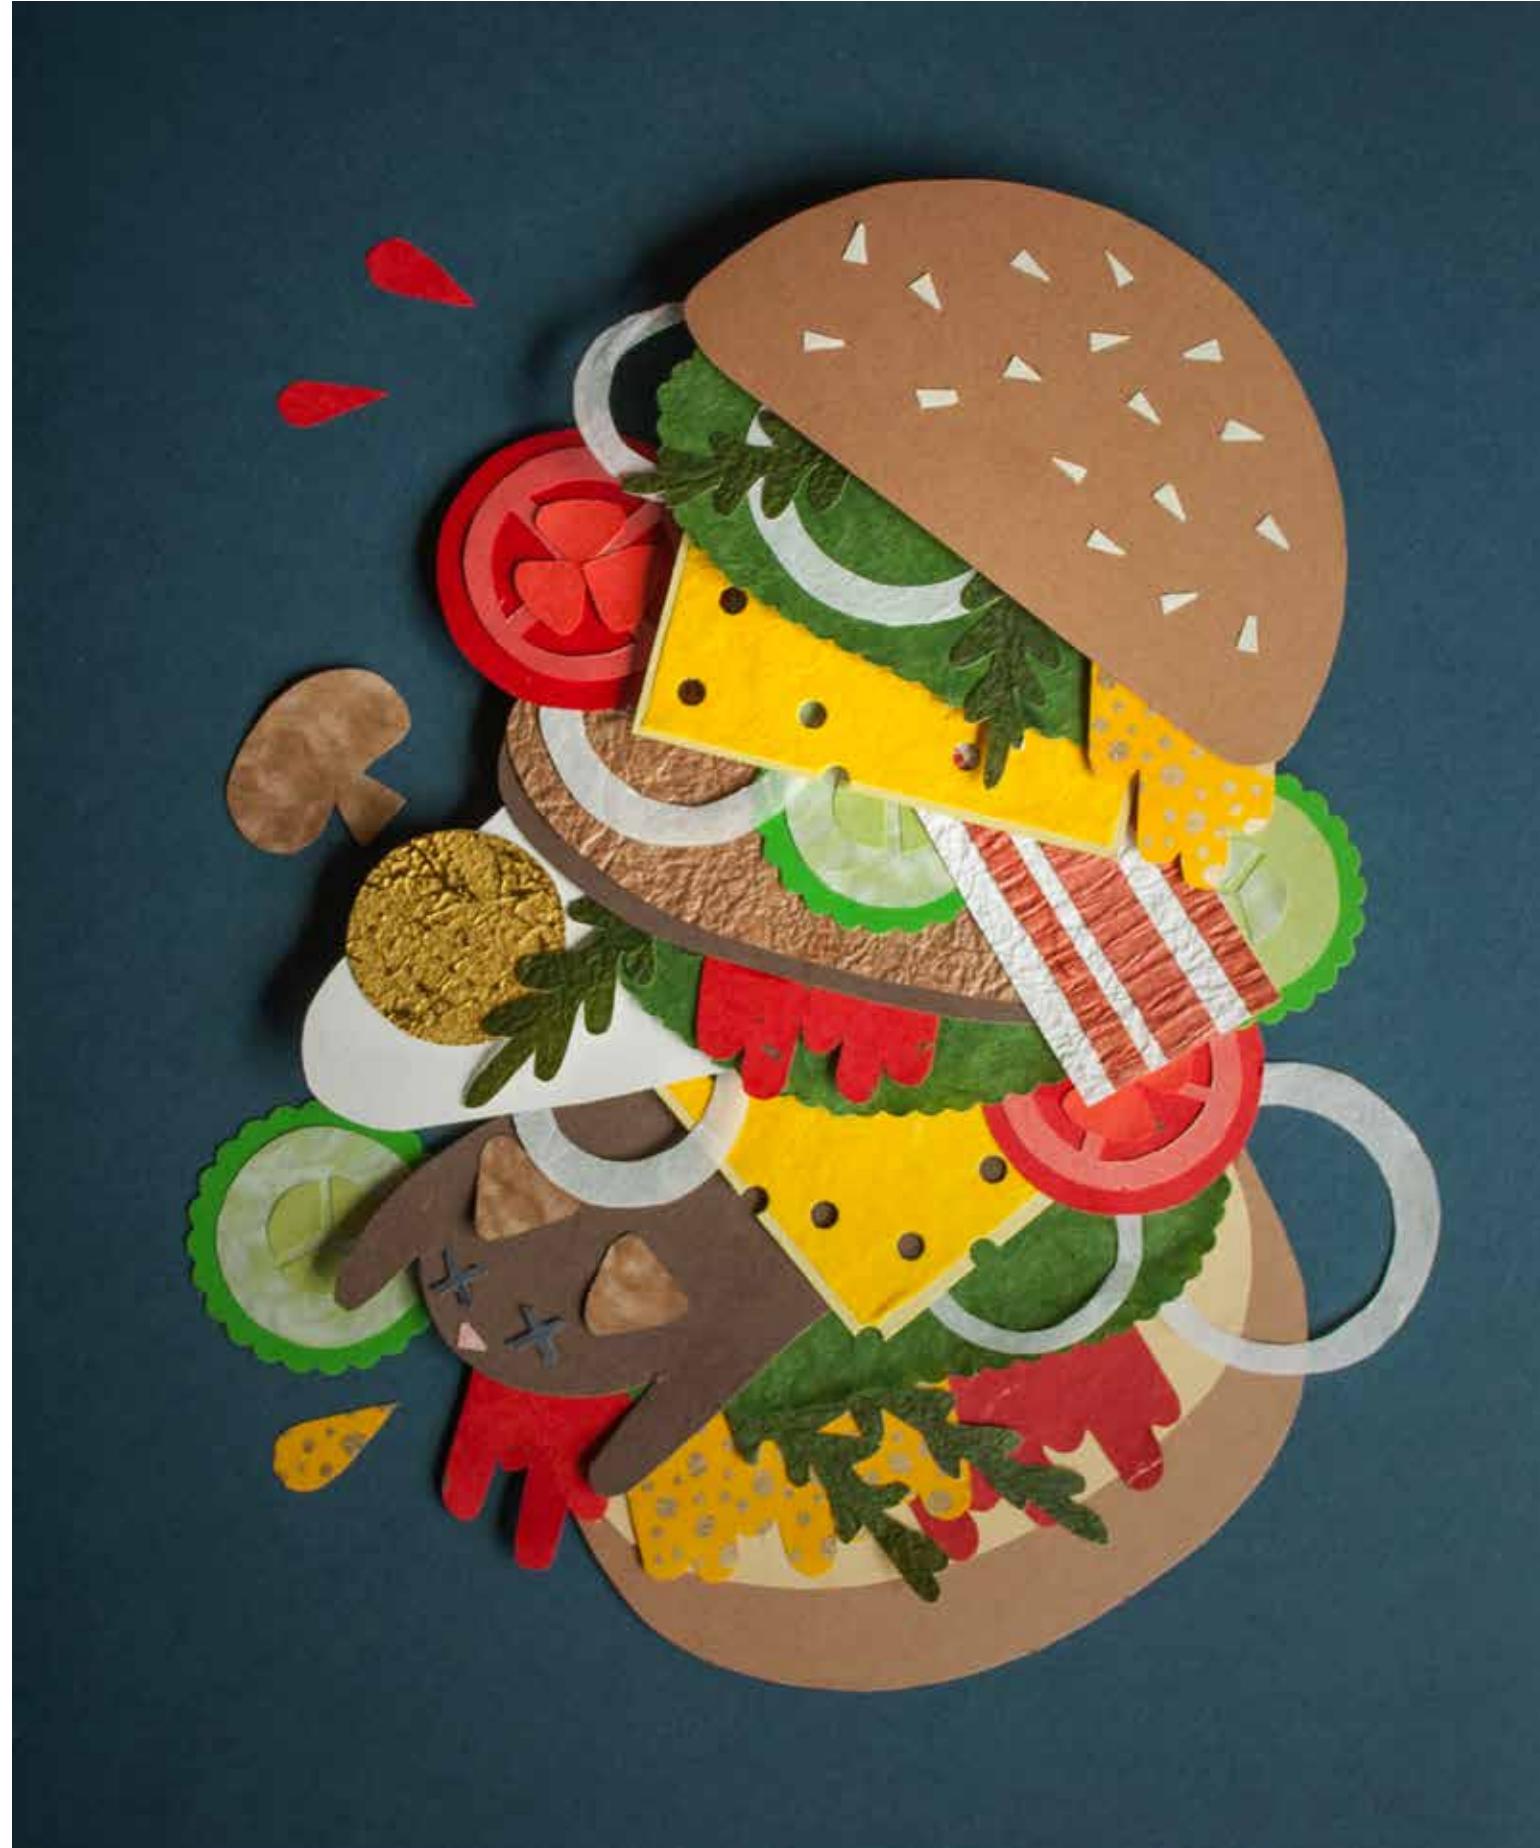

Reassemble the Robots!

The goal here is to match up the top and bottom parts of robots.

Robot Models

Works in Paper

Illustrative and sculptural paper works.
